1405 FM 803 Ste.B Olmito, Texas 78575

Office: (956) 525-7051

# Mission Statement

---

- A.L. Loran International, LLC. is a company dedicated to provide you with reliable quality workers in the industrial field.
- We are committed to fulfilling your needs in an ethical and socially responsible manner and can ensure your organization will obtain the best service available in the market.

# Services Provided

---

- Staffing services provided for industrial include:
  - Welders (1<sup>st</sup> and 2<sup>nd</sup> Class)
  - Pipe Fitters (1<sup>st</sup> and 2<sup>nd</sup> Class)
  - Structure Fitters (1<sup>st</sup> and 2<sup>nd</sup> Class)
  - Laborer/Helpers
  - Fire watch

## **Structure Welders**

Structural welders use aluminum, stainless steel and reinforced steel to erect structures that are often used in construction. Welding is done using a variety of designs such as fillet weld, groove weld, weld length, partial joint penetration, lap joints, weld spacing, weld size, transitions and the static and cycling loading. Welders may work outside with very hot materials and sometimes at great heights.

## **Structure Fitters**

Structural fitters will fit and join the often-large pieces of metal used to complete the project and read and interpret building specs and blueprints to determine the size of the material and the optimum order to complete each step in the project. Fitters are required to operate several different types of equipment for hand tools, fabricating machines, welding torches, hoists or cranes while outdoors or in a noisy indoors environment, and often on scaffolds.

## **Pipe Fitters**

Pipe fitters work on industrial piping systems, maintaining, installing, inspecting, and repairing the pipe systems and gauges and switches that operate the systems. Using tools such as electric screwdrivers, dies, levels, welding torches, and grinders. Pipe fitters can interpret technical drawings and plans.

## **Pipe Welders**

Pipe welders are responsible for laying the metal pipes and using heat to melt and permanently join them. Horizontal rolled position (1G), horizontal fixed position (5G), pipe incline fixed (6G), and vertical position (2G), are some of the several different positions used in welding. The ability to lift heavy objects, bend, stoop, and stand for long periods of time is part of the physical ability a pipe welder must have.

# Safety

- We have all required and appropriate coverage for the positions offered covering our employees and clients from liability.
- Insurance coverage:
  - Liability Insurance (\$2,000,000)
  - Workers Compensation including Long Shore Man & Harbor Workers Endorsement
- By constantly following regulations and guidelines we have proudly not had any loss of time or incidents nor claims on any job sites.

# Business Concept

---

- With modern technology we have created a well-developed system where we are able to assist at any time.
- With our employee enhancement program, we assist them with perfecting their skill, test their knowledge and experience before committing them to a position.
- Creating strong and dependable leadership in our employees and staff. We are confident that we are your solution to any skilled and unskilled labor needs.

# The Team

---

*We are a knowledgeable and dedicated team that works closely to give you quick and efficient results.*

## **President**

Mr. Ankjaer Jensen, (956) 454-6190

## **General Manager**

Mr. Soren Lundberg (956) 371-1278

## **Accounts/ AR/AP**

Mrs. Claudia De La Garza, (956) 203-7698

## **Lead Foreman (Welding & Labor)**

Mr. Raymundo Hernandez, (956) 545-7664

## **Administrative Assistant**

Miss Kaylee Mireles, (956) 443-8087

**Office: (956) 525-7051**

# Advantages/Competition

---

- Using our own resources, we help develop our staff capabilities in their area of expertise.
- By following all safety guidelines and acquiring all appropriate and necessary insurance and liability coverage, we are committed to awareness and safety at the worksite.
- We respect our competition and will provide respective competitive rates

# Additional Projects:

---

- We are ready to provide service and skilled labor for all your needs.
- In our facility we can do smaller welding and construction projects.
